Enthusiastic and detailed-Oriented Computer Science Graduate with a solid foundation in software Development, seeking entry – level position to apply technical skills in Problem solving and Collaborative Project Management to contribute to innovative solutions.

Education

Channabasaveshwara Institute of Technology
Bachelor of Engineering in Computer Science , CGPA – 7.0

XII (PCMC)
Mahesh PU College– 75%

Technical Skills

- JAVA
- SQL
- HTML
- CSS

Projects

Bookstore Inventory System

- Aimed to streamline and automate the management of book inventory, ensuring real-time updates, reducing manual errors, and enhancing customer service by providing accurate stock levels and quick order fulfillment." That ties the technical work to a bigger goal!
- Technologies: Core Java,OOP,Collections(List).
- The system allowed staff to log in securely, add new books, update stock quantities, and search for books by title or author. Each transaction updated the database in real-time, ensuring accurate inventory records. Staff could also generate simple reports on stock levels and sales patterns.

Responsive Navigation Bar

- Designed and implemented a flexible, responsive navigation bar for a portfolio website.
- Used a dark theme with hover effects, styled with CSS transitions.
- Applied a flexbox layout for centered navigation links, ensuring cross-device responsiveness.

INTERNSHIP

Contact Management System

- Designed and implemented a contact management system using Java and OOP principles.
- Created classes for contacts with attributes like name, phone number, and email.
- Implemented methods to add, update, delete, and search contacts efficiently.
- Used a console-based interface for user interaction, ensuring easy management of contact records.

Non-Technical Skills

- Problem Solving
- Good communication
- Analytical Skills
- Multitasking
- Interpersonal skills
- Adaptability
- Time Management
- Team Collaboration

Certifications

- JAVA CORE
