Nagashree G

Mysuru, Karnataka-570004
+91 7406649256 raonagashree29@gmail.com

Summary

Detail-oriented and highly motivated Electronics and Communication Engineering graduate with a passion for software development. Skilled in C/C++ and Python with hands-on experience in developing real-time systems and automation projects. Seeking an entry-level software engineering position to apply technical expertise, learn new technologies, and contribute to innovative software solutions.

Education

Vidyavardhaka college of engineering **Dec 2021 – May 2025**
Bachelor of Engineering in Electronics and Communication, CGPA – 9.11 *Mysuru, Karnataka*

XII (PCMB) **May 2020 – Apr 2021**
Marimallappa PU College– 99.5% *Mysuru, Karnataka*

Technical Skills

Programming: C, C++,Python, Object Oriented Programming(OOOPs),Data Structures and Algorithms

Technical Skills: Operating system,Computer Network
Tools and Technologies: VS Code, Cadence
Embedded Systems: 8051 Microcontroller, ARM, freeRTOS,ESP32

Projects

Skin Cancer Detection and Classification using ML. **May 2025**

- The project aims to build a deep learning-based detection system that can classify four types of skin cancer lesions using the YOLOv5s model.
- A labelled dataset from Roboflow was used for training, and the model was deployed in ONNX format for lightweight and real-time usage.
- A Flask-based web application was created, allowing users to upload images or capture them live for predictions. The system showed strong performance, with high precision (0.819), recall (0.855), and mAP@0.5 (0.869) after 100 training epochs.

Password Based Door Lock System using 8051 Microcontroller **September 2022**

- This project is a security system that controls the access to a door using a password entered through a keypad.
- The system uses the 8051 microcontroller.
- When the correct password is entered, the motor engine (acting as the door lock mechanism) is activated to open or close the door. If a wrong password is entered multiple times, an alarm is triggered for security.

INTERNSHIP

Kaynes Technology India Ltd **Jan 2025 – Apr 2025**
Company focusing on the electronic manufacturing service Mysuru, Karanataka

- Gained hands-on experience in different department in PCB design.
- I worked with microcontrollers such as 8051 and ARM, applying C programming for system testing and debugging
- Enhanced my technical and teamwork skills while preparing project documentation andtest reports.
- Developed collaboration, communication, and problem-solving skills.

Non-Technical Skills

- Problem Solving
- Analytical Skills
- Interpersonal skills
- Time Management
- Good communication
- Multitasking
- Adaptability
- Team Collaboration

Certifications

- Completed Networking fundamentals in Coursera
- Python for DSA in Coursera
